Multivision Intelligent Surveillance Ltd of Hong Kong said its net profit for the year to March rose to HK\$25.32 million from HK\$1.198 million a year ago, as sales more than tripled to HK\$95.292 million from HK\$25.101 million.

The strong earnings were due largely to the success of its digital video surveillance businesses, said the company. It expects continued improvement in its operating performance in the current year. — *AFX-Asia*
