English

SINGAPORE (AFX-ASIA) - Hong Kong-based **Multivision Intelligent Surveillance** Ltd said its year to March rose sharply to 25.32 mln hkd, up from 1.198 mln a year ago, as sales more than tripled to 95.292 mln from 25.101 mln.

The strong earnings group was due largely to contributions from its digital video surveillance businesses, which was very successful during the period, the company said.

The company expects continued improvement in its operating performance in the current year.
