High Performance NetServer

MultiVision Intelligent Surveillance Ltd. will unveil the NetServer Super 20, its latest addition to the NetServer Super series of digital video surveillance solutions. The enterprise-class digital video recorder is designed to deliver high performance capabilities, offering real-time simultaneous display, recording, retrieval and playback on all its 20 channels, which is unmatched in the industry. The NetServer Super 20 is ideal for mission-critical industries where reliability, scalability and availability of the solution are crucial.
