Mainboard-listed MultiVision Intelligent Surveillance says a major distributor has renewed and expanded its distribution contract with the company.

It said Elixir Group will raise its sales of MultiVision products and solutions to 4 million U-S dollars from half a million dollars for the year ending March 31, 2004.

MultiVision is a Hong Kong-based company specialising in digital video surveillance products.

It said the agreement with Elixir is an extension of a pilot project announced earlier this year, under which MultiVision supplied to Elixir about 200 cameras for a casino in Macau.

MultiVision said it's confident that demand for its products and solutions will continue to grow, particularly from the gaming industry in Macau.
